About Environmental Education NSW

EENSW is a State Chapter of the [Australian Association for Environmental Education](#) (AAEE), the national peak professional association for environmental educators in Australia.

We support education for sustainability in NSW, in keeping with the three major roles of AAEE:

- promoting the most extensive and effective use of education and engagement to help people live more sustainably and protect and enhance the local environment
- supporting its members and others in the sector via professional development
- building greater strength in local networks that facilitate collaboration and skill sharing

EENSW has a proven track record in the delivery of successful, well-attended and engaging conference events.

ABOUT LEARNING FOR CHANGE

LEARNING FOR CHANGE *yalbilinya nganhagu gurray*

Last year at the AEE national conference, Professor Daniella Tilbury provided insights into the forthcoming report “Education and Learning for Environmental and Sustainable Futures: 50 years of Learning for Change”. She journeyed through 50 years of environmental education and sustainability, beginning from the UN conference in Stockholm in 1972, where Environmental Education was first acknowledged. The current landscape demands an evolution in education as society progresses. The focus now lies in learning to know, be, do, work and collaborate with others.

Learning for Change is inspired by the forthcoming report “Education and Learning for Environmental and Sustainable Futures: 50 years of Learning for Change” and aims to provide a platform for environmental leaders and groups across diverse sectors to convene, network, learn from each other, create communities of practice, and strategise practical approaches for effecting change.

This year’s topics include wellbeing and resilience, agriculture as a climate and nature repair solution, social justice, designing learning for change, active hope and circular economy.

DISPLAYS

EARTHCARE
Halve Waste
The Steady State Economy
NSW Water for the Environment
STTOP
Environmental Education NSW with Sustainable Schools
Petaurus
Environment and Zoo Education Centres
Environmental Protection Authority and Primary Industries Productivity and Abatement Program
WATERUP
P-Lab (Possibility Laboratory)
Whole Systems Tools for Participation and Playful Learning
